PROJECTS

Ecommerce Sites Item Ordering

User can add supported e-commerce site's product in our system via link. System fetches the product, processes the data and display prices and charges to order that item to Nepal. Multiple payment gateways are integrated.

https://merowish.com.np

Appointment System (SAAS based) (with Api for app)

can be used by any company, create a person and their assistant, and see appointments for the person added by themself or the assistant. Also, it has a public random URL to display appointments on big monitors.

https://appointment.greentechconcern.com

Student Management System for Gurukul CA (SAAS based)
